JT100

The Ditch Witch® JT100 horizontal directional drill delivers power where you need it most—downhole. Not only will you drill more efficiently, but you will work more efficiently with the ability to carry the optional onboard loader and anchoring system. With no extra equipment needed, the JT100 gives you the power to reduce the size of the jobsite.

Large-capacity, 230-gpm (870-1/min) fluid pump and 2-inch fluid course help move fluid downhole for greater productivity.

100,000 lb (445 kN) of pullback and 12,000 ft-lb (16300 N-m) of torque for installations of large-diameter pipe.

Hydraulic cooling system uses less fluid than the competition, reduces maintenance costs and keeps the engine operating efficiently.

260-hp (194-kW) engine efficiently delivers power to all drilling functions, so you can get the job done faster.

Infinitely variable rotary drive enables the JT100 to match spindle speed and torque to power through virtually any soil condition.

Exclusive dual-pivot drill frame allows steeper entry angles without raising tracks off the ground.

Optional onboard loader and exclusive anchor system eliminate the need for large, expensive support equipment, reducing costs, setup time and jobsite size.

Heavy-duty double rack-and-pinion thrust drive is field-proven to push-pull through long, tough bores.

Specialized Ditch Witch® manufactured drill pipe is designed to provide greater strength and flexibility.
