ALL TERRAIN DIRECTIONAL DRILL

Ditch Witch

JT100 ALL TERRAIN

When you're challenged with a lengthy installation through every type of soil including solid rock, you need the superior power and technology offered by the Ditch Witch® JT100 All Terrain Horizontal Directional Drill. With the JT100 All Terrain you get 100,000 lb (445 kN) of pullback and up to 2,000 ft•lb (2700 N•m) of torque, powered by a huge, 268-hp (200-kW) engine. Everything is engineered to maximize the productivity of the machine's patented All Terrain technology, a two-pipe drilling system that enables you to drill and steer simultaneously.

Infinitely variable rotary drive enables the JT100 All Terrain to match spindle speed and torque to power through virtually any soil condition.

Heavy-duty, double rack-and-pinion thrust drive is field-proven to push/pull through long, tough bores.

Fully enclosed cab offers instrument panel positioned for visibility, conveniently places controls and an excellent view of the tool joint.

Optional onboard loader and exclusive heavy-duty anchor system eliminate the need for large and expensive support equipment, reducing transportation costs, setup time and jobsite size.

Large-capacity, 230-gpm (870-l/min) fluid pump plus larger hoses and fittings help move fluid downhole faster for greater productivity.

268-hp (200-kW) engine efficiently delivers tremendous power to all drilling functions, so you can get the job done faster.

Exclusive dual-pivot drill frame allows steeper entry angles without raising tracks off the ground.

100,000 lb (445 kN) of pullback and 2,000 ft•lb (2700 Nm) of torque make the JT100 All Terrain ideal for installations of large-diameter pipe.

Industry-exclusive, patented All Terrain two-pipe drilling system provides more power to the bit than any other rock-drilling system in its class.
