

PENETROL[®] DRY EU

PENETROL DRY EU surfactant is used to assist in counteracting the sticking tendencies of encountered clay or shale during drilling operations. The product is non-foaming when mixed with a Bentonite-based drilling fluid.

Functions

- Reduces and/or minimizes bit balling.
- Improves drilling efficiency by preferentially coating the bottom-hole assembly and drill string.
- Minimizes potential for accretion and agglomeration of cuttings.

Advantages

- Free-flowing granular product.
- Easy to mix and readily dispersible.
- Effective at low concentrations.
- Minimal to no foaming produced during high shear mixing or surface agitation.
- Compatible with other Baroid drilling fluid additives.
- Low aquatic toxicity.

Approximate amounts of PENETROL DRY EU surfactant added to water-based fluids:

0.6 - 3.6 kg/m³
